Students experiment with an online virtual laboratory set at a skate park. They make predictions of graphs before they use the simulation to create graphs of energy vs. time under different conditions.

## Energy Skate Park - Activity - TeachEngineering

Today's activity uses the PhET online simulator titled Energy Skate Park. Students explore conservation of energy as a skater rides a u-shaped ramp. I give a short demo on how to open the simulator, its features and the settings to use. The internet simulator is by the University of Colorado and is one of many interactive science simulators present at PhET.
