How to Make a Cladogram - Boston University

Cladograms Cladograms are constructed using a method known as 'cladistics'. This method analyzes a collection of heritable character data compiled by a researcher (morphology and/or DNA). This method groups taxa based on the number of characters that they share with one another. Cladograms Cladograms are evolutionary tree diagrams that

Cladograms - Integrative Biology

Consider the following animals: Earthworm Flatworm. Frog. Jellyfish. Lamprey. Tuna. Create a table of fundamental traits for these six animals as a basis for building a cladogram. Use traits that are either present or absent in a given organism. Use the jellyfish as an outgroup and construct a cladogram that accurately depicts the branching of the evolutionary lines of descent of these animals.

Question on creating a cladogram. (Biology)? | Yahoo Answers

Making Cladograms. Cladograms are diagrams that depict the evolutionary relationships between different groups of taxa (plural of taxon) called clades. By depicting these relationships, cladograms reconstruct the evolutionary history AKA phylogeny of the taxa. Cladograms can also be called "phylogenies" or "trees".
