By the end of the course, you'll have the skills and confidence you need to program in BASIC and design your own custom applications for home, school, or work.

### **Introduction to Programming - ed2go**

A common programming task is to find the elements of an array that satisfy a particular condition. The WHERE function is an essential tool for doing fast conditional array operations in IDL. Most operations that could be done in a Fortran-like style using FOR loops and IF statements can be done faster and more elegantly in IDL using WHERE.
