Phanerogamic plants have seeds. They include the gymnosperms and angiosperms. Plant Classification Review - Image Diversity: seeds

### **Plant Classification - Biology Questions**

A dichotomous plant key is an important tool used by biologists to identify plants. When you use a dichotomous key, you must answer a series of questions about the characteristics of the plant you are trying to identify. Some of the questions are easy to answer, but some knowledge of plant biology or special vocabulary is helpful.
