Resolvance of Grating. This approach to the resolvance of a grating has made use of the fact that the phase is a continuous variable which can be represented analytically, and that the differential of this variable is also well-defined. Since the Rayleigh criterion places the peak of one order at the first minimum of the adjacent order, the phase associated with being "just resolved" is ...

Notes: To capture a value from the URL, use angle brackets. Captured values can optionally include a converter type. For example, use <int:name> to capture an integer parameter. If a converter isn't included, any string, excluding a / character, is matched.; There's no need to add a leading slash, because every URL has that.
