Teaching inspires new kinds of frustration that you probably can't realize until you start teaching. It pairs your own insecurities from when you were in school with a strange, new authority (and a salary). As students, most of us were insecure in one way or another, lacked authority, and were forced to be at school.

In the People's Republic of China, the adulteration and contamination of several food and feed ingredients with inexpensive melamine and other compounds, such as cyanuric acid, ammeline and ammelide, are common practice. These adulterants can be used to inflate the apparent protein content of products, so that inexpensive ingredients can pass for more expensive, concentrated proteins.
