ABSTRACT Injectivity-index data are a useful guide in we planning and operational phases of fluid-injection operations. While they can be computed prior to the instigation of actual injection operations on the basis of fundamental-flow theory considerations, experience in two high-pressure gas-injection projects indicated that, when existing wells are involved, they could be established more ...

In physics, a force is any interaction that, when unopposed, will change the motion of an object. A force can cause an object with mass to change its velocity (which includes to begin moving from a state of rest), i.e., to accelerate.Force can also be described intuitively as a push or a pull.
