Lab 11 Animal Behavior Introduction: Ethology is the study of animal behavior. An animal's behavior is its response to sensory input. There are three types of behaviors: orientation, agonistic, and mating. Orientation behaviors take the animal to its most favorable environment. Taxis is when an animal moves toward or away from a stimulus.

AP Biology Lab 11: Pre-Lab Animal Behavior Background Perhaps one of the most difficult fields of biology to study is ethology, the study of animal behavior. Observation of a behavior is simple; interpreting what has been observed requires more effort; therefore, more than any other division of research in biology, ethology calls for patience, objectivity, and imagination.
