Angry Birds – Parabolas. Jon Orr April 27, 2012 5 Comments [UPDATED – Sept. 25 2015] We have just spent a week working with quadratics in MPM2D and today I had students create their own angry birds level. The only real requirement was for them to create at least two flight paths and model them with quadratic equations.

Do not have them make catapults for the Angry Birds Parabola Project. This will take entirely too much time on things unrelated to the standards you are supposed to be teaching. If this is the version of the project you want to do then partner with a shop class or art class where creating the catapult will meet a standard for that teacher.

Question 749246: Have a project with Angry Birds where you have to find the equation of a parabola for the bird's flight path in various situations. I have to pick a point at the origin and a point on the x axis for the pig to be placed and find the flight path (equation).

SOLUTION: Have a project with Angry Birds where you have ...

This set of games asks students to find the correct equation of the parabola in order to hit the pig! Three set of coordinates are given and students are required to calculate the equation of the parabola. They will be required to understand the equation of a quadratic, in particular the form $y=a(x - p)(x - q)$ would be helpful. Great fun!
