The image I had been using in the layer-list was larger than the screen resolution. I was trying to scale it to a specific size.

### **Followed Splash Screen Guide But Image is Stretched Not ...**

I have to admit that I actually really hate launch (or as I call it splash) screen on applications. On iOS and Windows we never had a choice and our apps always have a launch screen. On Android though we have always had the option to integrate a launch screen or not and in the past it was sort of frowned upon to have a launch screen in your app.
