If you draw too many lands, it can still be okay if your lands help function as spells. The Memorial cycle from Dominaria is a great example: many of them can be sacrificed for things you need when you're heavy on lands—either more creatures or just straight up more cards.. What does this mean? Well, if you play an extra land or two in your deck, but you have a number of Memorials in your ...

Resize the image using data-dependent triangulation. See Image Geometry for complete details about the geometry argument. The -adaptive-resize option defaults to data-dependent triangulation. Use the -filter to choose a different resampling algorithm. Offsets, if present in the geometry string, are ignored, and the -gravity option has no effect.
