After Es 1.0 version. the default file storage mode is Mmapfs.the mamapfs stores data in HD.But it use virtual memory concept.though data are present in HD,it looks like fetching data from RAM.It is more faster than other file system.. So the mmapfs might look consuming more space and It blocks some address space.But its is healthy and no problem at all.

4 Answers. Let's assume we have a queue named 'Demo' which receives messages from various users. Create a Listener which will listen to the queue 'Demo' continuously and as soon as the message is send to the queue the Listener will print out the message.

Microsoft Interview Questions | CareerCup

When planning your cluster, it's often best to overshard, which means to start with more shards per node than you expect to have in production and then move the shards to new hardware as they grow too large to share a single node of your cluster.This strategy allows you to grow without needing to consider splitting the index to new shards.

Getting Started with Solr - Lucidworks Documentation

After a tricky development process, the digital system allowing EU citizens to apply for the right to remain in the UK is now live. PublicTechnology examines the past, present, and future of a project that represents one of the most important technology programmes the government has ever undertaken.
